

Consultants

The Australian National Council on Drugs (ANCD) is the principal advisory body to Government on drug policy and plays a critical role in ensuring the voice of the community is heard in relation to drug policies and strategies. As part of this role, the ANCD regularly commissions research and discrete pieces of work to assist it to provide government with currently informed and specifically targeted drug policy advice.

To ensure that the ANCD can reach the broadest and most relevant expertise when calling for proposals in response to its commissioned projects, we keep a consultants register of suitably qualified individuals, consultancy groups and organisations.
